

MLS SPARTAN™

MULTI-LAYER STAINLESS STEEL HEAD GASKETS

Strong, Simple to Use & Ready for Battle.

Advanced manufacturing ensures trouble free, bolt-on performance without extra sealants.

Available in 4 thicknesses: .028" .039" .051" .067"

No Sealant Required

Constructed of high-grade shape-memory AISI 301 stainless steel. Using state-of-the-art manufacturing processes, the layers maintain optimum flatness. The embossments have uniform molecular grain structure in the radii, which increases spring-contact with the block and head, while reducing stress points within the gasket.

NEW GAS-STOPPER

Feature on selected applications

Concentrates clamp load at critical sealing areas around combustion chambers.

Seals ~15% more HP over standard MLS.

Look for part numbers with 'GS' suffix.

Example: M361051**GS**
